

# MPCA Smart Salting for Local Leaders

Did you know that chloride from de-icing salt is toxic to freshwater wildlife and damaging to our infrastructure? About 40 lakes and streams in the Twin Cities Metro area are currently impaired by chloride, but you can be a part of the solution.

We Are Water MN and the Alexandria Lakes Area Sanitary District are partnering with the MPCA to offer a free, virtual 2-hour Smart Salting for Local Leaders workshop. Learn about the impacts of chloride and find out specific action steps for policy changes that reduce salt pollution in your community.

**Monday, August 1, 9:00 – 11:00 am**  
**[Register on Eventbrite today!](#)**

## Who should attend?

- City council members and other elected officials
- Members of sustainability and environmental commissions
- Board members of housing associations, neighborhood associations, or watershed districts
- Other local decision makers
