In consideration of granting this permit the owner agrees to:

- 1. Install a High Efficiency (HE) water softener that meets the NSF/ANSI standard 44 and has a minimum efficiency of 4,000 grains/lb regenerated salt.
- 2. Maintain and operate the private sewer service at no expense to the ALASD. Make monthly payments for sewer. **Monthly user charges begin on the date of inspection.** Prevent groundwater or surface water from entering the sanitary sewer.

Signature of Owner: _____ Date: _____

ALASD Approval: _____ Date: _____

- ALASD recommends foam insulation of any portion of the sanitary sewer line laid at a depth of less than 7 feet.
- Air testing of private service lines is mandatory on all newly installed service pipes.
- Air gauge must be visible for inspector. All necessary equipment is supplied by the contractor.
- ALASD staff are prohibited from entering excavation trenches, hole, or confined space when performing air test inspection.
- Cleanout located immediately outside the structure is recommended.
